DETAILED ACTION

Miscellaneous

1. Please note that the examiner of record has changed.

Information Disclosure Statement

2. The information disclosure statement (IDS) previously submitted on 14 February 2002 and considered by the prior examiner was missing initials indicating consideration of reference "AR". Accordingly, the reference has been considered by the current examiner as indicated.

Oath/Declaration

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02. The oath or declaration is defective because it does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

Drawings

Art Unit: 2614

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include reference character "24" not mentioned in the description. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. Updated status of all co-pending applications is further required as appropriate. It is the examiner's understanding that referenced Attorney Docket Number RCA 89385 is currently co-pending US Pat Application No. 09/475,448.

Response to Arguments

6. Applicant's arguments filed 01 November 2005 with respect to the combined Casement and Collings references failing to disclose or suggest "automatically resolving conflicts between said override instructions upon detecting the existence of a conflict when said set of limits are enabled" have been fully considered and are persuasive. Therefore, the rejection

Art Unit: 2614

has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of claims 13 and 22 being dependent upon canceled claims.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 13 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular, claims 13 and 22 are dependent upon canceled claims.

Allowable Subject Matter

9. Claims 11, 14-20 and 23-26 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The examiner concurs with applicant's arguments such that the art of record fails to particularly teach or disclose the particular limitations pertaining to the usage of a "conflict revolver" as claimed. As further noted in applicant's arguments, the art of record (ex. Collings) discloses the particular usage of parental control systems which further provides the parent with the ability to temporarily override established limits. As noted by the previous examiner, the ability to temporarily override limits can create conflicts between override instructions (Final rejection – Response to Arguments, mailed 22 April 2005). The Collings reference in combination with Casement provides a means to resolve these conflicts, namely by allowing the viewer to view a program even though it is restricted. Accordingly,

Art Unit: 2614

the combined references would appear to operate such that a conflict resolver automatically resolves conflicts between override instructions when the viewing limits are established, However, the particular resolution between those conflicts appears to occur without detecting the existence of conflicts between override instructions as required by the claim language.

10. Claims 13 and 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- The Knowles et al. (US Pat No. 6,505,348) reference discloses a system and method for resolving conflicts between multiple electronic program guides.
